Markups and Other Considerations

25 percent markup for PDR on Aluminum panels

25 precent markup for PDR oh High Strength Steel (HSS)

If it makes sense, consider PDR on a panel even if the number of dents is greater than the matrix. Use matrix and enter a manual line entry

Allow $50 per oversize dent. An oversize dent is one that is larger than a half dollar size

A larger SUV, larger truck, or van **may** warrant a 25 percent markup for roof panels

Generally, markup is not applicable for exotic vehicle, door or glue pulls

Depending on severity, 25% markup may be applicable for double panels (including roof rails) when entire panel is double panel

When combination repair (conventional & PDR) is necessary on a panel that qualifies for markup, apply the markup to the PDR portion only

Corrosion Protection $10 per panel when necessary, up to $30 maximum

PROPRIETARY AND CONFIDENTIAL. FOR INTERNAL USE ONLY.
